### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Applicant claims, among other things, a method of starting a catalytic process within a tailgas combustor with a liquid fuel until a sufficient flow of an anode effluent is available, the comprising the steps of supplying a liquid fuel flow to the combustor in a quantity sufficient to meet a heat demand of a known magnitude placed on the combustor, supplying an oxidant feed stream to the combustor, mixing said liquid fuel and oxidant feed stream together in the combustor to form a fuel/oxidant flow, vaporizing said fuel/oxidant flow with a heating element within the combustor as said fuel/oxidant flow passes therethrough, reacting said vaporized fuel/oxidant flow in a primary catalyst as said vaporized fuel/oxidant flow passes through said primary catalyst so that the combustor generates heat to meet said heat demand, exhausting said reacted fuel/oxidant flow from the combustor, and maintaining the supplying of said liquid fuel flow to the combustor until the combustor is supplied with an anode effluent flow of a magnitude capable of allowing the combustor to meet said heat demand without said liquid-fuel flow.

Art Unit: 3749

The prior art of record, taken alone or in combination therewith, does not disclose nor make obvious the combination as claimed by applicant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
